## EAGLESMART

EagleSmart battery chargers range from a portable Single Phase 110/120Volt AC (plug-in) to a 480Volt AC Three Phase model. Manufactured by Bassi with forty years of Italian craftsmanship. The operation of the EagleSmart charger is managed by the new MRG Charge Controller, which is a microprocessor based electronic control board. The MRG Charge Controller monitors the entire charging curve and it incorporates several safety features.

The front panel of the MRG charge controller is composed by four status LEDs (CHARGING – 80% CHARGED – COMPLETE – FAULT! / ALARM!) and 3 ammeter LEDs.
